

Chemist

6, Brunswick Square,

W.C.

Dec. 23rd 1869

My dear Mr. Lascelles,

I have read your little book & admire the general plan; it should be very useful for the class of students for whom it has been written.

The errata I have noticed are:-

P. 76 Line 4 from bottom
H-CL for HCl

P. 92 - "Chlorophyl" for "chlorophyll"

P. 128. Imagine a student putting
the blade of his penknife into
"a little HNO_3 " ! Line 7 from bottom

P. 147 "Jugs & coarse earthenware are
glazed by volatilizing HCl in an oven
which holds the porous material." Wants
more explanation.

P. 189 - Top line "and" for "are".

P. 196. Line 8 from top: -
"Naphthaline" for "Naphthalene".

P. 197. Line 6 from bottom: -

Why "Jamaica ginger"?

I thought this was a sweetmeat!

P. 210 - Line 2 from top: -

+ for +

With best wishes for the season
& wishing your little work every
success,

Yours very truly,
R. Meldola.
